

Absolutely! Since you want to **enhance your MVP** without making it too complex, here's a broader list of features you can consider for **NearLoop MVP** to make it stand out from Google/Justdial:

1. Core Enhancements (Must-Have)

1. **Vendor Ratings & Reviews** – Basic star ratings or short user feedback.
 2. **Service Category Labels** – Clearly show the type of service each vendor provides.
 3. **Distance Display** – Show exact distance from user to vendor (in km/m).
 4. **Click-to-Call / WhatsApp** – Instant contact with pre-filled messages.
 5. **Favorites / Shortlist** – Save preferred vendors for quick access later.
-

2. Convenience Features

6. **Search Filters** – By category, rating, or distance.
 7. **Sort Options** – Closest first, top-rated, or most popular.
 8. **Basic Map View** – Show vendors' location pins on a small map.
 9. **"Open Now" or "Available" Tags** – Highlight vendors ready to take calls.
 10. **Recently Viewed Vendors** – Keep track of vendors users checked last.
-

3. Engagement & Trust Features

11. **Profile Pictures / Logos** – Makes vendors feel real and trustworthy.
 12. **Verified Badge (Optional)** – Even a simple "Verified" label after manual check.
 13. **Call History / Activity Log** – Track how many times a vendor was contacted (anonymous).
 14. **Featured Vendors** – Highlight new or highly-rated vendors.
 15. **Simple Ratings for Categories** – E.g., AC repair vs Fridge repair for the same vendor.
-

4. User Experience Features

16. **Minimal Loading Animation / Progress Indicator** – Faster perceived speed.
17. **Dark Mode / Light Mode toggle** – Simple UX enhancement.
18. **Quick Refresh / Nearby Update** – See new vendors as they come online.
19. **Push Notifications for Nearby Services** – Optional for urgent needs.
20. **Simple Feedback Option** – Users can report wrong numbers or inactive vendors.
